

LEAN EDUCATION AND DEVELOPMENT

About Us

Lean Education and Development Limited are one of the UK's largest and most successful providers of continuous improvement work related vocational training.

Our programmes are designed with yourselves, either to complement your existing team journey or to help with any current strategies you are trying to implement within the company.

Why Continuous Improvement?

It is universally accepted amongst successful world class businesses, that engaging with all employees and accessing the improvement potential they each have is the key to remaining competitive. It is vital that we constantly look at all our processes and procedures and ask ourselves "Is there a better way?"

We all have a role to play in contributing our skills and expertise to challenge traditional methods, drive out waste, improve our products and services – and delight all our customers, (both internal and external).

"If you always do what you always did, you'll always get what you've always got."

LEAN FOUNDATION PROGRAMME

Why choose our LEAN Foundation Programme?

The Diploma is a 6 day workplace development programme that provides instruction, practice and constructive feedback on key Lean competencies. It is available to anyone in an organisation that has no prior Lean qualifications.

Continuous Improvement is the key to driving your business further, developing essential ongoing workplace skills and helping your business stay ahead of the competition by empowering your staff.

Who is it for?

The LEAN Foundation Programme is designed for:

- Employees that do not have any formal qualifications in Lean
- An employee that cannot commit the time to our full apprenticeship programme
- An employee that wishes to start their LEAN journey

What will employees achieve?

- Knowledge of the basic Continuous Improvement Tools and Techniques.
- The ability to put the LEAN process into practice with a real business efficiency project.
- The Level 2 National Diploma in Business Improvement Techniques qualification.

The programme covers:

- Effective Team working
- Workplace Organisation Techniques (including 5S)
- Application of Continuous Improvement Techniques (Kaizen)
- Root Cause Analysis
- Basic statutory regulations and safety requirements
